GET A
SHOT AT
HEALTH

Hepatitis A: Men who have sex with men need Hepatitis A vaccine to provide protection against hepatitis A virus, a serious infection of the liver that can be fatal. The vaccine is usually given in 2 doses, 6–12 months apart.

Human Papillomavirus (HPV): Men who have sex with men are at high risk for infection with HPV. You should be vaccinated against HPV if you are age 45 or younger. The vaccine is usually given in 3 doses over a 6-month period.
