## **HPV VACCINE REMINDER!**

Our records show that you or one of your family members started the HPV vaccine series. It is now time to receive the next dose.

The HPV vaccine is most effective when the series is completed. All kids who are 11 or 12 years old should get two shots of HPV vaccine six to twelve months apart. If your child is older than 14 years, three shots will need to be given over 6 months.
